#### *Maintenance Fees, Water Charges, Etc.*

There is hereby imposed upon every lot in The Properties and upon every Owner thereof the fees, water charges and other assessments specified or otherwise provided for in this Section 6, the obligation and liability for payment of each of which shall arise at the time of every sale of every lot by Developer to any Owner whether by installment payment agreement, by deed or otherwise, irrespective of whether or not such obligations are expressed in such agreements or deeds. By acceptance of such agreement or deed or by otherwise acquiring a lot in The Properties each Owner agrees to pay all such fees, water charges and assessments specified or otherwise provided for in this section as are applicable to the lot owned by each such Owner.

All fees, water charges and other assessments imposed by this section against each lot, together with interest thereon and costs of collection thereof, shall be the personal obligation of the Owner thereof and shall be a charge on the land and continuing lien upon the lot against which it is made or levied and shall take precedence over all unrecorded liens and all liens charge or other assessment. The right of any Owner to enjoy and use the Common Properties as herein provided shall be automatically suspended during any and all periods during which any of said fees, charges and assessments against the lot of that Owner remain due and unpaid.

An annual maintenance fee of \$55.00 per unimproved lot of The Properties and \$90.00 per improved lot of The Properties shall be paid by the Owners thereof for the maintenance and improvement of the Common Properties and for the general upkeep, maintenance, management, operation, payment of taxes and insurance on the Common Properties and the general welfare of the Community. The maintenance fee shall be payable to the Developer annually on the 1st day of July 1972, and on the 1st day of July in each year thereafter. The fee shall be considered paid in advance and there shall be no prorating thereof.

After establishment of the Association and conveyance of the Common Properties, all annual maintenance fees shall be paid to the Association. The Association may increase the annual maintenance fee on lots in The Properties subject to approval of the Owners of not fewer than two-thirds of the lots. Any such increased amount must, however, bear a reasonable relationship to changes in costs or the scope of benefits to Owners to be provided thereby and shall be for the exclusive benefit of all Owners. The Association may also, with the consent of the Owners of two-thirds of the lots in The Properties, levy special assessments for capital improvements or other nonrecurring expenditures for the maintenance or improvement of the Common Properties payable within one year from the date of such levy.

The Developer proposes (but does not covenant or commit) to construct a water system to serve all lots in The Properties. At or after such time as water service may be made available to lots within the Properties, the Developer will give written notice to which such water service is available shall pay to Developer an annual fire service standby charge of \$30.00 per lot which may be billed on an annual, quarterly or monthly basis at the discretion of Developer. In addition, a hook-up fee of \$95.00 or the actual cost thereof at the time of such hook-up, if greater, shall be charged for each connection made at the time of making such connection. Following hook-up, an annual water usage charge of \$70.00 per lot (in lieu of said standby charge) shall be payable to Developer which may be billed on an annual, quarterly or monthly basis at the discretion of the Developer. No owner who has constructed a well prior to such time as water service may be made available to lots within The Properties shall be required to hook-up and use water service after it has become available and under no circumstances shall said \$95.00 and \$70.00 charges be due from any such Owner unless that Owner at some time thereafter voluntarily hooks-up and uses the water service. Such \$70.00 charge may be adjusted annually for cost-of-living increases as determined by the United States Government. Notwithstanding the foregoing, in the event Developer applies for regulation of such water system by appropriate state authority, then the rates and conditions of service approved thereby shall control. Developer reserves the right to sell the water system and all rights to water charges and hook-up fees to a private or public water company.

Developer may, at its option, bill Owners for maintenance fees, water charges and other charges and assessments on a consolidated basis annually or at other convenient intervals and may act as collecting and disbursing agent for the Association, any water company or other public or quasi-public utility.
